

# Did You Know?

Tomato plants grow two different ways. Plants can grow to an exact height and produce flowers and fruit all at once. Plants can also grow and produce flowers and fruit all season long.

Developed by the Pennsylvania Department of Education and Penn State University (Project PA).

This project has been funded at least in part with Federal funds from the U.S. Department of Agriculture. The contents of this publication do not necessarily reflect the view or policies of the U.S. Department of Agriculture, nor does mention of trade names, commercial products, or organization imply endorsement by the U.S. Government.
